Blue was my mom's 2nd favorite color... so now there is one blue and one red.... one for each hand. These candles will be lit forever in memory of her.

Red was my mom's favorite color

“ As it appears, with my sincere apologies, I did try to add Sue Rau (her sister) and Rodney Bradford (her deceased brother) to the obituary and they did not appear on it today but my fingers will be crossed it will appear in the Sunday paper tomorrow.

I did visit my mom right after her birthday and she was happily munching on a big mac, fries, and coke. The only thing she ever asked for during the year 2020 was her favorite snacks and Pepsi. On 4/22/20 her nurse gave her last set of medications right after midnight at 12:10am then as the nurse checked in again at 1am she had passed. When I seen her body she looked like she was not in pain and very peaceful. There will be no services per her request as my mom did not want services or viewings. As we all face the dangers of the virus spreading across the states it is even more reason to stay healthy and I know my mom would want you to be safe with your family at this time. So if you must feel you are apart of some type of ceremony, you can go to burger king or pizza hut or your favorite Chinese place and place an order and eat with the ones you love. Those foods were my mom's favorite and I know she would be smiling down on you for enjoying life and enjoying what you love to eat with the ones you love too.

I have received some cards in the mail from friends of my mom that she knew from Dove Westgate Church she used to attend and greatly appreciate the cards. I will save them all and put in her memorabilia box. If you wish to add your card to her memorabilia box as well, then please send to:

Hi Jaynell I am a cousin to your mom. Unfortunately for me I have never met her. I'm glad she is at peace with God. I am Bob's daughter and would be happy to be in touch with you if you would like to know me. Hope you have comfort in your family and what a great tribute you have written above.
